Portfolio: <https://jsihyeon.online>

LeadTaro: <https://www.leadtaro.com>

Github: <https://github.com/wprkftlgus>

Summary

Self-driven Full-Stack Engineer with 5+ years of hands-on experience building and shipping production web applications. Founded and independently launched LeadTaro, a B2B SaaS lead-generation platform, handling everything from cloud infrastructure to UI design. Recently integrated an AI-powered cold email generation feature into the platform, leveraging modern LLM APIs to automate personalized outreach at scale. Comfortable across the full stack — React/Next.js on the front end, Node.js/Express or .NET on the back end, and AWS/Docker in production. Eager to join a collaborative team and grow into a mid-level engineering role.

Certifications

CITA AI Ethics & Regulations Certification (Completed)

Covered key AI ethics principles, including fairness, bias, transparency, and data privacy (GDPR).

Skills

Languages: JavaScript (ES6+), TypeScript, C#, HTML5, CSS3, SCSS, SQL	Cloud & DevOps: AWS (EC2, ECS, ECR, S3, RDS, IAM, CloudWatch), Azure (App Service, SQL Database), Docker (Containerization & Image Builds), Nginx, PM2, GitHub Actions (CI/CD), Certbot (HTTPS/SSL), Hetzner Cloud (Worker Service Deployment), Redis-based Task Queues
Frontend: React.js (Hooks, React Router, SPA), Next.js, Angular, Vite, Tailwind CSS, Bootstrap, Three.js	Auth & Security: JWT, Cookies, Bcrypt, OAuth 2.0 (Google Authentication), Environment Configuration (.env)
Backend: Node.js, Express.js, ASP.NET Core Web API, REST APIs, Middleware, CORS	Tools: Git, GitHub, Visual Studio Code, Microsoft Office, Netlify, Vercel
Databases: MongoDB (Mongoose), MySQL, MsSQL, Entity Framework Core, AWS RDS, Upstash Redis	Practices: Responsive Web Design, Mobile-First Development, UX/UI Fundamentals, Distributed System Awareness, Unit/Integration Testing Awareness
AI Integration: Experience integrating LLM APIs for automated content generation (e.g., cold email generation with prompt engineering and retry handling)	

Experience

LeadTaro – Founder & AI-Driven Fullstack Developer, 03/2026 - Current

Sihyeon Jegal - United Kingdom

- Built and launched a B2B lead-generation SaaS platform from scratch, covering product design, full-stack development, cloud deployment, and growth.
- Architected a distributed system separating an API server (AWS ECS + Docker) from a background worker service (Hetzner) coordinated via Upstash Redis queues for heavy scraping tasks. Stored environment variables securely in AWS S3; managed infrastructure entirely as sole developer.

- Implemented Google Maps and social-media scraping pipelines, increasing result yield per query from 20 to 25+ through scroll-timing optimisation (Puppeteer).
- Integrated Stripe payments and Google OAuth; secured auth with JWT, bcrypt, and cookie sessions.
- Handled authentication and authorization with JWT, bcrypt, cookies, Google OAuth, and Nodemailer.
- ECR image builds, EC2 load-balancer health checks, CloudWatch monitoring, and internal SSL certificates.
- Integrated an AI-powered cold email generation system using LLM APIs, enabling automated and personalised outreach with custom prompt engineering and retry handling for reliability.
- Leveraged AI-driven solutions to accelerate development while ensuring secure, maintainable, and production-ready code.

Self-Directed Software Engineer, 01/2021 - Current

- - Leeds, UK

- Developed **8 personal and collaborative projects**, demonstrating strong skills in front-end and back-end development.
- Built a **full-stack SaaS web application**, implementing features such as authentication, database management, REST APIs, and responsive user interfaces.
- Technologies used: **React, Vite, Angular, SCSS, Tailwind CSS, Node.js, Express, C#, .NET, MySQL, MongoDB, HTML, CSS, JavaScript.**
- Designed and managed **cloud infrastructure and deployments** using **AWS (EC2, RDS, S3, IAM)** and **Azure**, ensuring secure and scalable application hosting.
- Implemented **CI/CD pipelines using GitHub Actions**, automating build, test, and deployment workflows.
- Configured **Nginx** as a reverse proxy, managed Node.js processes with **PM2**, and implemented HTTPS using **Certbot**.
- Practiced **version control with Git**, monitored production services, and maintained clear technical documentation.
- Applied **problem-solving, software design principles, and debugging skills** to deliver scalable and production-ready web applications.

Software Engineer(Frontend), 05/2023 - 12/2025

M Star Factory - Seoul, South Korea

- Developed Mezzanine Dermatology website from scratch in collaboration with another developer.
- Developed user-friendly website interfaces using HTML, CSS, and JavaScript for enhanced user experience.
- Implemented responsive web design principles to guarantee optimal viewing across various devices.
- Improved web design and usability through UX testing.

Airbnb Cohost, 03/2024 - 09/2024

Mithalia Ltd - Leeds, UK

- Operated and managed a short-term rental property end-to-end, including guest communication, listings, and pricing
- Communicated with domestic and international guests to handle enquiries, bookings, and issue resolution
- Produced high-quality property photos and optimized listings to improve visibility and booking rates
- Promoted listings across multiple platforms to maximize occupancy
- Managed calendars, availability, and day-to-day operations independently

Military Security Specialist & Transport Operator, 11/2021 - 05/2023

South Korean Military - Siheung, Gyeonggi Province, South Korea

- Demonstrated discipline, reliability, and teamwork in a high-responsibility environment.
- Conducted security patrols, access control, and operational reporting.
- Operated and maintained transport vehicles for personnel, and equipment.
- Warned violators of rule infractions and escorted unauthorised people off-premises in line with company procedures.

Education

2025 University of Ulsan - South Korea
BSc (Hons) Naval Architecture & Ocean Engineering
[Degree] Graduate

- Completed a comprehensive engineering program focused on advanced mathematics, physics, mechanics, and systems analysis.
- Gained hands-on experience in structural design, CAD modelling, simulation, and computational analysis.
- Built strong expertise in fluid dynamics, thermodynamics, structural analysis, and control systems.
- Developed analytical thinking and data-driven problem-solving through engineering modelling and technical documentation.
